

QUALITY POLICY STATEMENT

Document ID: TSL-POL-009-01
Revision: 01
Effective Date: 01/04/2025
Review Date: 01/05/2027
Owner: MDJS

All our contracts and projects are managed in line with our standard operating procedures outlined in our Quality Management System (QMS). Technical, contractual, legal and logistical risks are managed throughout all projects and continually reviewed against the agreed budget, deliverables and time-scales.

We work with our clients throughout the project life-cycle to deliver high-quality data and project management.

We have set operational objectives to support our strategic direction and ambitions, and to ensure we achieve the highest levels of applicable statutory and regulatory compliance. These objectives help us to make continual improvements in safety, quality, and customer satisfaction, and are continually reviewed and kept up to date.

This quality policy is displayed on the Tritonia website, and at Tritonia head office. Copies of this document and of the quality objectives can be made available to any relevant interested parties.

This quality policy is authorised and endorsed by Dr. Martin Sayer, Managing Director of Tritonia Scientific Ltd.
